

Common Van Leasing Questions

“Your new van is important to you – you need to know that the people you are dealing with can help you make the right decision. You can be 100% confident that when you call us, you will get the right advice for YOU and YOUR business!”

Will I get a brand new vehicle?

You will get the benefit of a brand new vehicle along with a full manufacturers warranty - to give you complete piece of mind you can choose any make or model of vehicle to suit your needs.

When can I expect to take delivery?

We aim to deliver your vehicle straight to your door with 7 – 10 working days. If you choose a model that isn't readily available and can't wait, we will endeavour to recommend a suitable alternative

What are the benefits of leasing over buying from a dealer?

A motor dealer will only offer you products from a range that they sell. Try asking a Vauxhall dealer their opinion of a VW or Mercedes van! We are truly independent and our role is very different. We want to make sure we deliver a vehicle to you that is an exact match for your requirements both now and in the future. On top of that, we buy the vehicles at the keenest possible price and will always be less expensive than buying from a dealer.

Can I put extras on the vehicle?

We can arrange to supply and fit a range of extra items to your new van. If you have specialist items that you want to fit yourself, feel free to fit these at your own cost.

Can I have the vehicle sign written?

We actively encourage people to sign write their own van. What could be a better advert than to have your fresh new van complete with your business logos on it? A new van is a great rolling advert and will give your customers confidence in you. All we ask is that if you choose to return the van to us, please ensure that you remove all the lettering and decals beforehand.

Who is responsible for insuring the vehicle?

The monthly van lease costs we advertise do not include insurance. We ask that you insure the vehicle on a fully comprehensive basis. We recommend that you call David Willis of A-Plan as he has managed to provide massive savings for over 80% of our customers.

I am not bothered what sort of vehicle it is, but I know the budget I need to stick to. Can you help?

A lot of people come to us with no idea of what van they want, but know roughly how much they want to spend. We can easily identify vans within different pricing categories and are 100% confident that we can find the right van for YOU and YOUR business
